

2017 Wooden Globe Awards Call for Entries

Every year the WMIA recognizes extraordinary companies and institutions with the prestigious Wooden Globe Awards. These awards are presented for notable success and achievements, accomplished in part through the use of high technology machinery and software supplied by WMIA member companies.

Take this time to recognize excellence!

Nominations are now being accepted for all three categories of the 2017 awards. This is your opportunity to honor one of your most deserving customers or educational institutions with a highly-regarded WMIA Wooden Globe Award.

Please see the following page detailing the awards criteria and information needed to submit a nomination.

What a Deal!

WMIA is making it worthwhile to get your whole team involved in the process! The Wooden Globe Awards will be presented during a General Session of the 2017 Woodworking Industry Conference (WIC) in Palm Springs, April 25-28, 2017. The nominator for each winning entry will have the opportunity to personally present the award to their nominee at the awards ceremony. WMIA will pay the WIC registration fee and travel expenses for the nominators of the winning entries. In addition, the expenses for the award winner (and their significant other) are paid by WMIA.

Bonus: Whether or not your nomination is chosen to receive an award, all nominators will receive a polo shirt emblazoned with the WMIA logo!

— Email your nominations/questions to: jlinder@wmia.org

THE DEADLINE TO SUBMIT NOMINATIONS IS FEBRUARY 12, 2017

2017 WMIA Wooden Globe Awards Entry Form

Innovator

Nominees for the Innovator Award should currently produce a unique and innovative wood-based product or utilize an innovative process to produce a wood-based product using high technology machinery supplied by one or more WMIA member companies.

Educator

Nominees for the Educator Award should be an educational institution or company with a structured curriculum tailored to training individuals for careers in the woodworking industry. The curriculum must include hands-on training on high technology machinery supplied by one or more WMIA member companies. The curriculum must extend beyond training individuals for a single company.
